

Personal care, modern medicine – in your language

At our medical practice, we combine personal care with modern, specialized medicine. Our main focus is **diabetology** – we support people with type 1 and type 2 diabetes with expertise, empathy, and up-to-date technology like insulin pumps and continuous glucose monitoring systems.

We also offer comprehensive general medical care: from preventive check-ups and lab tests to ultrasound scans (abdomen and thyroid), vaccinations, ECGs, and 24-hour blood pressure or heart rhythm monitoring.

As part of Germany's **structured treatment programs (DMP)**, we care for patients with diabetes, coronary heart disease, COPD, asthma, and also help with smoking cessation.

What else do we offer? **Travel medicine consultations, individual nutrition counseling, and video consultations** – all tailored to your needs and everyday life.

And to make you feel even more at home: we speak **English, Spanish, Russian, and German**.

We look forward to caring for you!
